PORTFOLIO

Empowered by Artificial Intelligence

Sason – Smart Photo Editor

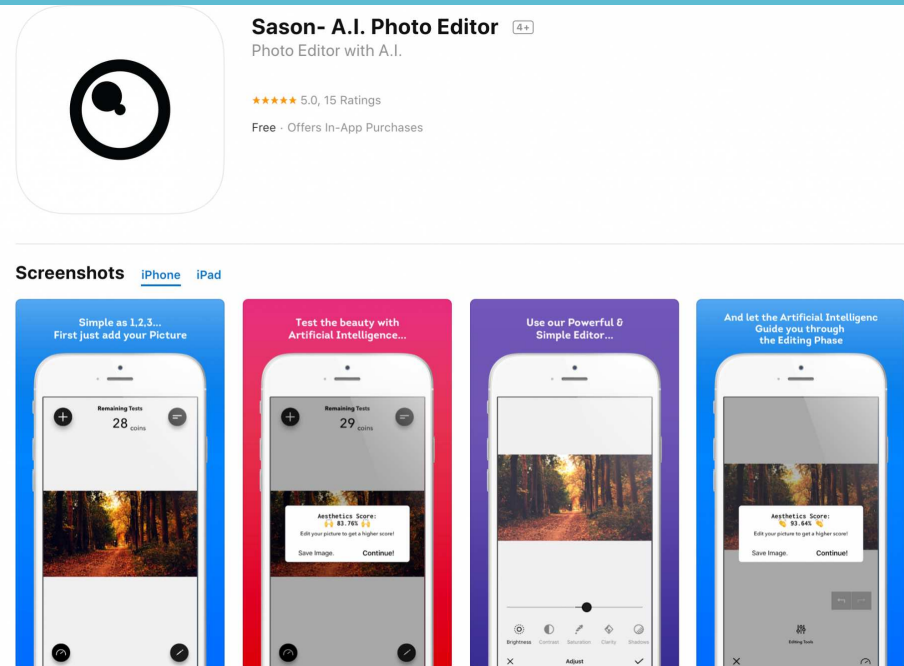

<https://apps.apple.com/us/app/sason-a-i-photo-editor/id1329583413>

- The goal of the mobile application is to help influencers create engaging digital content equivalent to professionally captured photos.
- A feature suggest how to compose a picture and how to frame the subject in the picture
- The app helps users efficiently brainstorm new ideas, which reduced the time it takes to produce engaging social media content by 50%.

#Top 500

Sason was trending in the App Store, reaching Top 500 Apps in 7 countries.

"Incredible app that makes anyone feel like a pro photographer
Really incredible, and perfectly designed. This app allows anyone to create professional photography grade pictures with the power of A.I. I won't upload a picture anywhere without getting it checked by this app.."

Empowered By Artificial intelligence

Capture – Photographer in your Pocket

<https://captureapp.co/>

- The goal of the application is to allow businesses to create engaging content by analyzing and scoring the visual quality in real time.
- 6irdview's team is building the application from scratch: design research development and currently in beta testing
- We utilized image shading and working with GPU using languages such as Metal.
- We modularizing codebase and we are working with Docker.
- We are training our machine learning model using aws-cli.
- We are developing algorithms that process lookup tables to enhance images

Technology

Imbue – Global Digital Interoperable Gym Membership

Coming Soon
to the App
Store

Imbue is a geo-aware map-based mobile application that shows members the nearest gyms to their location. It allows users in the community to enter a facility in the Imbue network at any given time. Currently, the application is in beta testing throughout Minnesota.

Key Features: Payment Processor, User Database Management System, Geo-Location, QR Code, Authentication, Face ID, and vendor portal.

UI & UX Design

Mime – Social Networking

COMMUNICATION PLATFORM

A social networking application that allows users to chat live via messaging. Think of Mime, as a combination of FaceTime and Snapchat.
